## Overview

The Pennsylvania Department of Human Services' HIPAA-compliant Provider Reimbursement and Operations Management Information System (PROMIS<sup>e</sup>™) has adopted the new version 5010 X12 standards. These standards are in compliance with the CMS mandate effective January 1, 2012.

This Companion Guide contains detailed instructions for interpreting the ASC X12 005010X222 Professional (837) transaction records for all of the different types of services that can be submitted to PROMIS<sup>e</sup>™ in the 837 Professional format. **Please disregard any instructions that do not pertain to the services for which you are submitting.**

Submitters (individual providers, billing services, software vendors, and managed care organizations) must complete a certification process in order to submit transactions to PROMIS<sup>e</sup>™ for production processing. The certification process consists of the submission of test claims to verify that all transactions are HIPAA compliant and conform to PROMIS<sup>e</sup>™. To initiate the certification process, see the certification registration process on the DHS web site at <http://www.dhs.state.pa.us/provider/promise/certification/index.htm> or contact the Hewlett Packard Enterprise Provider Assistance Center at 800-248-2152.

## Companion Guide Instructions

One of the new terms born out of HIPAA is *payer variability*. As each payer works to make its system HIPAA-compliant, there is a realization and an allowance that payers require information and values/formats specific to their systems. As such, each payer requires that transactions be completed with specific data. This Companion Guide was developed to communicate the Pennsylvania Medical Assistance-specific information required to successfully submit the 837 Professional transaction.

This Companion Guide is to be used in conjunction with the *ASC X12 Implementation Guide* found at <http://store.x12.org>. The *ASC X12 Implementation Guide* is the main source of information about the transaction sets. The Companion Guide contains:

- DHS interpretation/application of the data elements that support Medical Assistance transaction submissions,
- The methods utilized to convey data that are not included in the ASC X12 Implementation Guide, but are required for processing Pennsylvania Department of Human Services transactions; and
- Clarification for certain, less obvious, but still standard, uses of the transaction.

## Revisions to the Companion Guide

To aid the provider community in organizing these Companion Guides and the revisions that may occur, this document will have a revision schedule and notification process.

The initial release of this Companion Guide is June 2010. The first release reflects all the known information as of this date. However, as the implementation phases of PROMIS<sup>e</sup>™ progress, updates and releases of new information may be forthcoming.

### **Revision Process:**

For each new release of this Companion Guide, the information that has been changed since the previous version will be located in this section of the guide. If a revision is made to a data element, it will be detailed in the Revision(s) Description section in the table containing the element. DHS will clearly define the change that was made so it can be integrated into your process.

Updated releases of the Transaction Guide will be posted on the DHS website. You are encouraged to check this site regularly.
