

Hospital Quality Improvement Program Opioid Use Disorder Emergency Department Initiative Performance Measure

The Opioid Use Disorder (OUD) for Emergency Department (ED) follow-up reports are generated using a Department of Human Services (DHS) modification on the HEDIS® measure “Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse or Dependence (FUA)”.

While the HEDIS® measure is looking at all types of alcohol or other drug (AOD) abuse, the DHS modification limits the data included to only Opioid/Opioid Poisoning diagnoses. Also, the HEDIS® measure only evaluates the primary (or the first) diagnosis on the claim/encounter. The DHS modification includes diagnoses in up to the ninth position.

Each version applies a continuous enrollment limitation (from the date of the ED visit through 30 days after the ED visit -31 days total) to the eligible denominator population. The DHS modification is limited to Medical Assistance recipients enrolled in a Medicaid MCO participating in the Physical Health HealthChoices program during that eligibility period.

The HEDIS® measure is very prescriptive and limited as to what is included as a follow-up and includes follow ups in both 7 and 30 days. The DHS modification includes all ED visits (with or without admittance) that received treatment, as identified by DHS, within 7 days of their OUD related ED visit. DHS will also include admissions that meet the modified inpatient criteria are included in the numerator. DHS will not consider another ED visit as an acceptable follow-up within 7 days.

This measure is being used to evaluate each ED visited by the recipients separately. If there were multiple ED visits to the same ED within 7 days and all visits include OUD related diagnosis in up to the ninth position, then DHS considers the first date of service to be “anchor date” or date to begin the evaluation. When a recipient has OUD related ED visits to multiple EDs within the 7 day follow-up period, DHS will evaluate each ED separately.
